

# Environmental Awareness 1 Day Course (CPD certified)

Naturally Compliant Ltd was established to provide environmental survey, advice and monitoring resource to the construction industry. As a result, our people are all experienced environmental professionals, with significant on-site construction phase experience. This means we are able to offer training and advice that is practical and solution-driven.

This environmental awareness training course was specifically designed for those operatives "on the ground" to help them understand the risks associated with non-compliance, how to mitigate those risks and what non-compliance may mean for them or the company they work for. The following information details the key topics and learning outcomes;

## 1. An introduction to Onsite Environmental Management

- 1.1. Who are the statutory authorities and what are they responsible for
- 1.2. Planning conditions and how they impact on the development
- 1.3. Typical environmental management methods

## 2. Water Management and Pollution Control

- 2.1. The legislation associated with pollution
- 2.2. The principles of water management and pollution control
- 2.3. Options for disposal

## 3. Waste and Material Management

- 3.1. The legislation associated with Waste
- 3.2. The principles of waste management
- 3.3. Duty of Care – What is required

## 4. Protected Species and Places

- 4.1. The various legislation associated protected species and places
- 4.2. The constraints they may present
- 4.3. Management of ecological constraints and mitigation options

## 5. Invasive Non- Native Species (INNS)

- 5.1. The legislation associated with INNS
- 5.2. Mitigation methods for common species

## 6. Restoration

- 6.1. Restoration goals
- 6.2. Principles of restoration

**Who Should Attend:** - Delegates working in the construction and engineering sectors requiring a basic understanding of the environment and its protection. Including but not limited to the following:

Civil Engineers | Site Engineers | Section Engineers | Site Managers |  
Site Operatives | Operations Managers | HSE | SHEQ |

**\*Anyone with added Environmental Responsibilities within their job role.**
